SETUP GUIDE

Follow these step-by-step directions to set up your new Guardzilla camera. Protecting and monitoring your environment is only minutes away. Go to **www.guardzilla.com/support** for more information on your new Guardzilla camera.

1 Go to the Apple App Store and download the Guardzilla app. Once downloaded, launch the app.

2 A carousel of product images will appear. Swipe your finger on the product images until the 360° Live Video Security Camera image and description appear, then select **Next**.

**3** Plug in your Guardzilla 360 camera, then select **Next**.

4 Wait for the LED light on the front of the camera to begin blinking blue, then press **Next**.

5 The screen will prompt you to locate your 2.4 gHz wireless network name and password. When you have located them press **Next**.

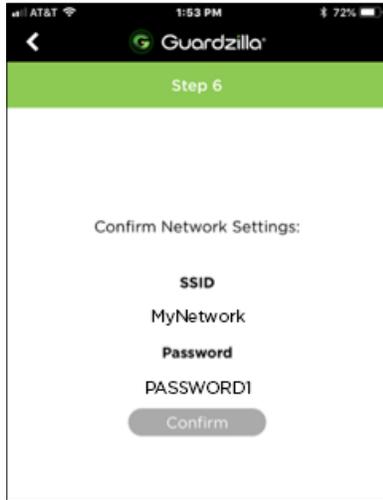

6 Your Guardzilla app will scan your wifi network and list your network name. Confirm that the listed network is a 2.4 gHZ network and is the correct network, then press **Next**.

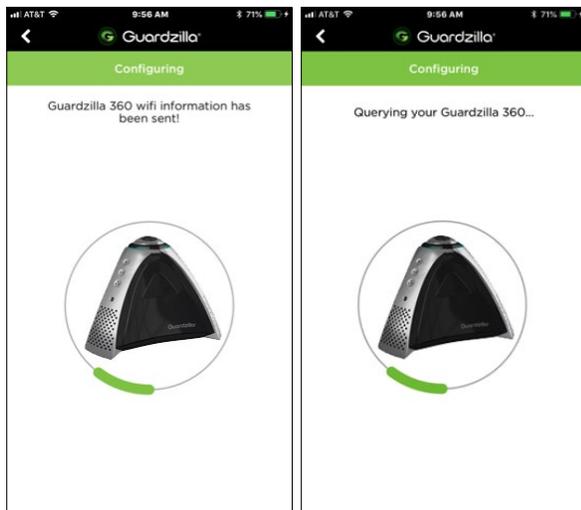

7 Enter your home WiFi network password, then press **Next**. NOTE: Your password is case sensitive. Also ensure that there are no spaces <u>before</u> or <u>after</u> your password.
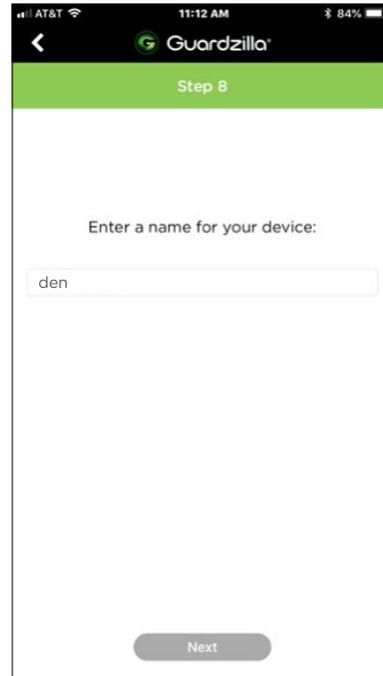

8 Confirm that the correct **SSID Network** is showing and that you have entered the correct **Password**, then press **Confirm**.

9 Your Guardzilla will inform you that your connection information has been sent, and the camera is now going through the connection process to your WiFi network.

10 You will now be asked to name your camera. Enter a camera name (e.g. den) and press **Next**.

11 After your connection has been made choose a video cloud storage option for accessing all motion detection video clips. Three options are offered:

1. **FREE Plan**
2. **PREMIUM Plan**
3. **ENHANCED Plan**

12 The **Congratulations** screen will appear. You can now go to the home screen and begin using your Guardzilla camera. **IMPORTANT:** Your camera can be placed on a flat surface, or hung from a ceiling or wall. The default setting is for a flat surface placement. If you want to hang your camera on a ceiling or wall go to: **xxxxxxx** to set up your camera for the different camera positions.
