# USING VIDEO CLOUD STORAGE
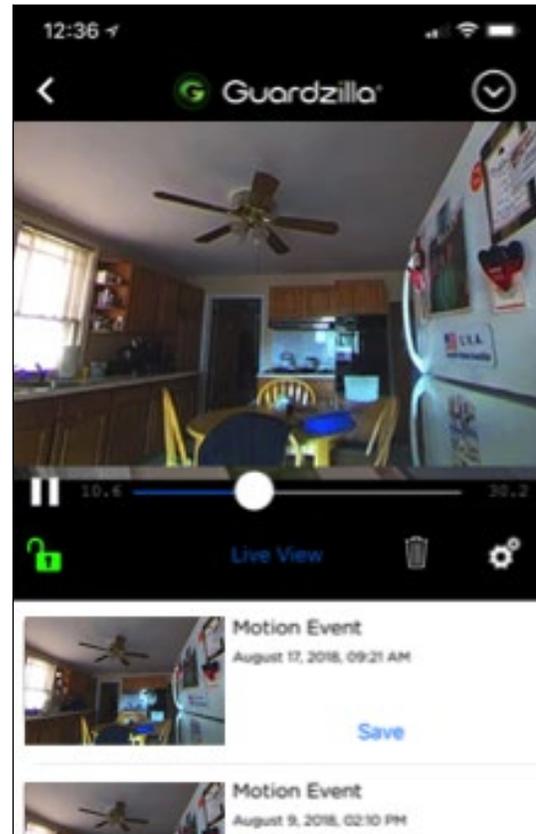

What is Guardzilla's video cloud storage program?

Every time a Guardzilla camera is armed and motion is detected a video of the event is captured, dated with a time stamp and stored on the **Monitor** area of the app below the main live monitor image. This area also captures all actions (e.g. alarm set) and images taken. **Note:** Video can **only** be viewed in your Guardzilla app. To view videos follow these steps:

1 Touch the thumbnail image of the event or image. Press **Save** to save the video or image to your phone.

2 The video recording will begin playing. Press the **Live View** to return to a live streaming video of the protected area.

3 **Do I have to pay to receive and view the video?**
